| Education goals  | <p>The PhD program covers different dimensions of economics and statistics, with attention to sustainability dimension, relying on the composition of the Faculty and the Board.</p> <p>The interaction of these disciplines provides a thorough and up-to-date knowledge of qualitative and quantitative (statistical and econometric) skills. The Ph.D. Program offers a complete framework for research and training with numerous interconnections.</p> <p>The research topics ranges from applied statistics and econometrics, to theory, to applied economics, political economy, to socio-economic and environmental studies. Other topics cover the analysis of tax evasion, the underground economy and informal and laundering money, living conditions (poverty and inequality) and the labor market, environmental and territorial aspects of sustainable development and economic prosperity.</p> <p>The attention paid to the issue of sustainability is declined in a</p> |
